

JOHN DENLIE PAHANG

Software Engineer

Philippines | 09622716412 | johndenlietitopahang@gmail.com

PROFESSIONAL PROFILE

Software Engineer with 2+ years of experience designing and building responsive, user-focused web applications, scalable full-stack solutions, and decentralized applications. Proficient in React, JavaScript, TypeScript, Node.js, and Go, with hands-on experience across relational databases (MySQL, PostgreSQL) and Linux-based development and deployment environments. Skilled in smart contract-driven Web3 development, applying blockchain architecture to real-world use cases such as ticketing, real estate staking, and task verification. Known for strong problem-solving ability, clean and maintainable code, and a consistent focus on delivering high-quality user experiences.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Go (Golang), REST APIs, C++, C#

Blockchain / Web3: Smart contract-based application design, decentralized application (dApp) architecture, blockchain-based staking and verification systems

Databases: MySQL, PostgreSQL, Supabase

Systems & Tools: Linux (shell scripting, environment setup, server administration basics), Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

Blockchain Developer

2025 – 2026

- Designed and built decentralized applications spanning event ticketing, real estate staking, and task verification, applying blockchain architecture to solve real-world trust and transparency problems.
- Implemented secure, tamper-proof transaction flows and staking mechanisms, integrating front-end interfaces with underlying blockchain logic.

Front-End Developer

2025 – 2026

- Developed responsive, user-friendly web interfaces using React and modern front-end technologies, improving usability and visual consistency across products.
- Collaborated closely with designers and developers to translate Figma designs into pixel-perfect, production-ready UI components.

Full-Stack Developer

2024 – 2026

- Built and maintained full-stack web applications end to end, from initial concept and architecture through deployment, working across Node.js and Go services on Linux-based environments.
- Delivered client and personal projects using modern JavaScript frameworks paired with Node.js and database-backed back ends (MySQL, PostgreSQL), ensuring reliable performance and clean integration between layers.

PROJECTS

TicketChain

2025

- Built a blockchain-powered ticketing system enabling secure, tamper-proof ticket transactions for event organizers and attendees.

BlockEstate

2025

- Developed a decentralized property staking platform allowing users to invest in real estate assets through blockchain-based staking mechanisms.

Questlog

2025

- Created a blockchain-based task tracking application that records task completion and progress in a transparent, verifiable system.

Online Shopping App

2023

- Designed and developed a full-stack e-commerce platform featuring product management, user authentication, and order handling using MySQL/PostgreSQL-backed data layers.

EDUCATION

Bachelor of Science in Computer Engineering — University of Cebu

Aug 2021 – May 2026
